ALKLEMAH PROFILE

**Integrated Construction, Engineering
& Technical Solutions Since 1980**

ALKLEMAH is a multidisciplinary contracting company delivering integrated construction, engineering, and technical solutions for residential, commercial, industrial, and infrastructure projects across the Kingdom of Saudi Arabia.

ABOUT COMPANY

ALKLEMAH is a multidisciplinary contracting company delivering integrated construction, engineering, and technical solutions across residential, commercial, and industrial sectors.

With decades of industry experience, **ALKLEMAH** has built a strong reputation for delivering high-quality contracting solutions across residential, commercial, industrial, and infrastructure sectors. Our approach combines technical expertise, efficient project management, and strict quality control to ensure successful project delivery.

Driven by innovation, quality, and client satisfaction, **ALKLEMAH** remains committed to delivering reliable, sustainable, and value-driven solutions that support the growth of modern construction and infrastructure projects.

VISION & MISSION

Vision

To become a leading contracting and engineering company recognized for delivering innovative, reliable, and high-quality construction, infrastructure, and technical solutions across the Kingdom. We aspire to build long-term value through engineering excellence, sustainable growth, and a commitment to exceeding client expectations in every project we undertake.

Mission

To deliver integrated engineering and contracting solutions through professional execution, technical expertise, and innovative project approaches. We are committed to maintaining the highest standards of quality, safety, and operational efficiency while building lasting relationships with our clients and contributing to the development of modern infrastructure and communities.

INTEGRATED SOLUTIONS

ALKLEMAH delivers integrated contracting and engineering solutions that combine construction, infrastructure, technical systems, and building services under one professional framework, ensuring seamless project execution and consistent quality across all disciplines.

Construction & Infrastructure

We deliver reliable civil works, steel structures, electrical systems, MEP solutions, and infrastructure services designed to support residential, commercial, industrial, and development projects with the highest standards of quality and execution.

Technical & HVAC Solutions

Our technical division specializes in HVAC systems, security solutions, passive networks, and low-current infrastructure, delivering efficient, scalable, and future-ready systems for modern buildings and facilities.

Established in 1980

CIVIL & MEP WORKS

Civil Works

Comprehensive civil construction services including infrastructure works, concrete structures, excavation, site preparation, and building construction for residential, commercial, and industrial projects.

Steel Structures

Design, fabrication, and installation of steel structures for warehouses, factories, production facilities, poultry houses, and industrial buildings, ensuring strength, durability, and safety.

Electrical Works

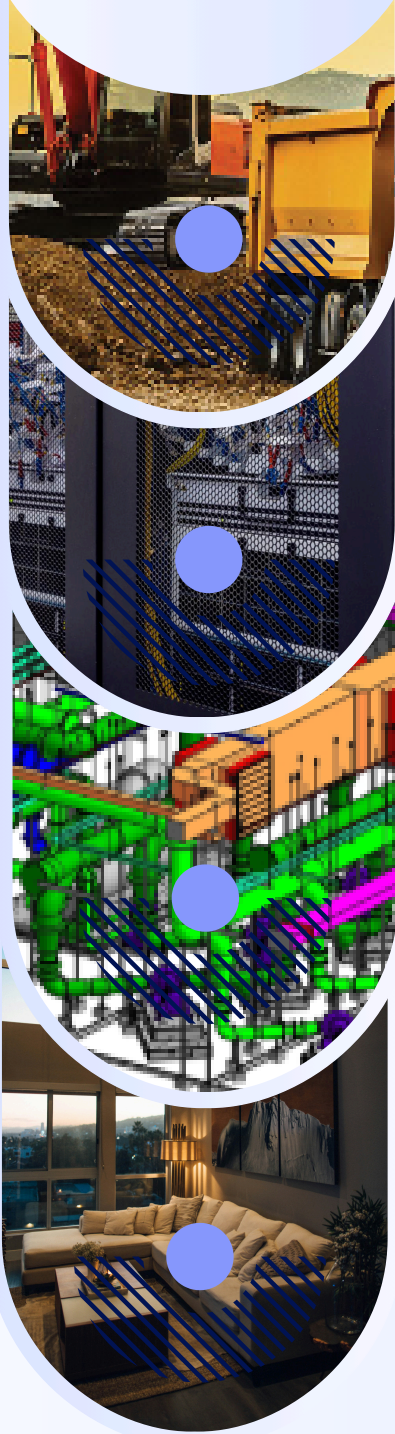

Complete electrical solutions including power distribution, lighting systems, panel installations, and maintenance services designed for safe and reliable operations.

MEP Solutions

Integrated mechanical, electrical, and plumbing services including HVAC, fire protection, plumbing networks, and building support systems.

Interior Design

Modern interior design and finishing solutions focused on functionality, aesthetics, space planning, and optimized environments for residential, commercial, and hospitality projects.

CIVIL WORKS

Comprehensive civil construction services including infrastructure works, excavation, concrete structures, site preparation, and building construction designed to support residential, commercial, and industrial projects with quality, safety, and reliable execution.

Infrastructure & Construction

Professional civil works including road construction, earthworks, concrete structures, and infrastructure development services executed to modern engineering standards, ensuring durability, efficiency, and long-term project performance.

Concrete & Site Development

Integrated site preparation and concrete solutions including foundations, slabs, grading, and structural works designed to support efficient project delivery, construction stability, and long-term infrastructure reliability.

STEEL STRUCTURES

ALKLEMAH provides complete steel structure solutions for warehouses, factories, production facilities, poultry houses, and industrial buildings. From engineering design and fabrication to installation and project delivery, we provide durable, efficient, and cost-effective structural systems that meet project requirements and international standards.

Engineering & Fabrication

Our specialized engineering team performs structural design, load calculations, and detailed shop drawings in accordance with approved codes and standards.

We also provide complete fabrication services including cutting, welding, surface treatment, painting, and anti-corrosion protection.

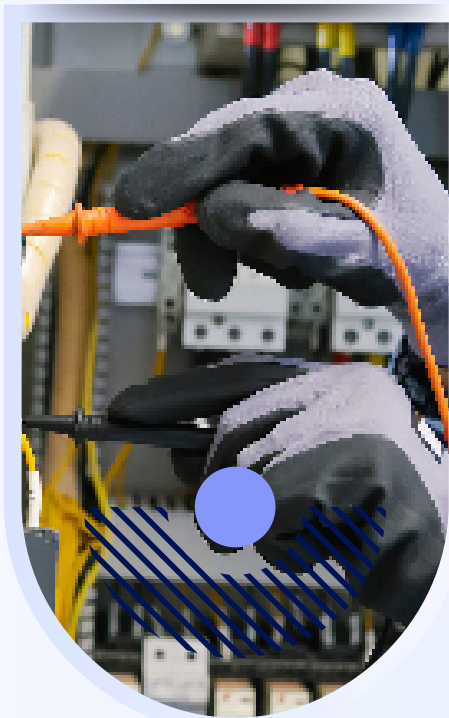

Installation & Safety

With experienced installation crews, lifting equipment, and scaffolding systems, **ALKLEMAH** delivers safe and efficient steel structure erection for projects of all sizes while maintaining strict compliance with safety regulations and quality requirements.

ELECTRICAL WORKS

Residential Systems

Industrial Systems

Integrated electrical solutions including power distribution systems, lighting networks, panel installations, maintenance services, and energy-efficient infrastructure designed to support safe, reliable, and efficient building operations across residential, commercial, and industrial projects.

Our Electrical Works division delivers professional installation, maintenance, and system support services with a focus on safety, operational reliability, and long-term performance. From lighting and power systems to distribution panels and infrastructure support, we provide solutions tailored to modern building requirements.

MEP SOLUTIONS

Integrated MEP solutions including mechanical, electrical, plumbing, HVAC, fire protection, and building support systems designed to enhance operational efficiency, safety, sustainability, and long-term building performance across residential, commercial, industrial, and infrastructure projects.

Mechanical & Plumbing Systems

Professional mechanical and plumbing solutions including HVAC systems, ventilation networks, water supply, drainage systems, and fire protection infrastructure engineered for efficient operation, energy performance, and compliance with modern building standards.

Electrical & Integrated Building Systems

Comprehensive electrical and integrated MEP systems including power distribution, lighting infrastructure, maintenance planning, building automation, and coordinated engineering services designed to support reliable operations and optimized facility performance.

Established in 1980

INTERIOR DESIGN

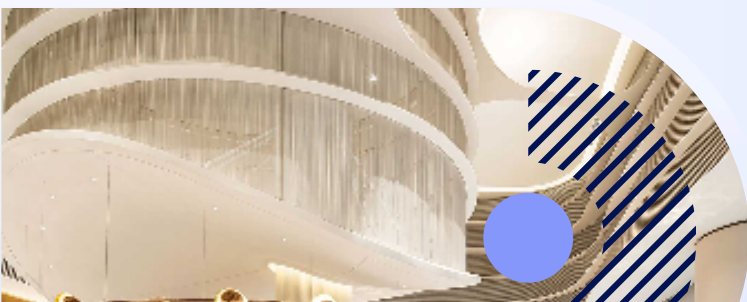

Professional interior design and finishing solutions combining functionality, aesthetics, and modern design concepts to create comfortable and visually refined spaces for residential, commercial, and hospitality environments. Our designs focus on quality, space efficiency, and delivering interiors that reflect each project's identity and operational requirements.

Space Planning & Design

Professional interior design and space planning services focused on functionality, layout optimization, lighting concepts, and modern design aesthetics to create balanced and efficient interior environments tailored to client requirements.

Finishing & Interior Solutions

Comprehensive interior finishing solutions including material selection, lighting design, furniture coordination, decorative elements, and space enhancement features designed to deliver comfort, visual appeal, and a high-quality interior experience.

HVAC SERVICES

HVAC solutions designed to deliver efficient cooling, ventilation, and climate control systems for residential, commercial, industrial, and infrastructure projects. **ALKLEMAH** provides integrated HVAC services focused on quality, safety, energy efficiency, and long-term operational performance.

Our services include the supply, installation, testing, commissioning, and maintenance of Split Units, Cassette Units, Concealed Split Duct Systems, Floor Standing Units, Package Units, and VRF Systems. We deliver reliable and energy-efficient solutions tailored to each project's requirements.

We specialize in the fabrication and installation of galvanized duct systems, including rectangular, circular, and spiral ducts, along with all related accessories such as thermal and acoustic insulation, grilles, diffusers, dampers, and air distribution components. We also provide Bag Filters, Pre-Filters, Aluminum Filters, and air purification solutions to enhance indoor air quality and environmental comfort.

Supported by experienced engineers, specialized duct fabrication teams, and skilled HVAC technicians, **ALKLEMAH** delivers professional HVAC design, installation, testing, commissioning, maintenance, and system optimization services while maintaining the highest standards of quality, safety, and performance.

SECURITY & NETWORK SYSTEMS

Security Systems

Integrated security solutions including CCTV surveillance, access control systems, intrusion detection, intercom systems, and smart monitoring technologies designed to enhance safety, operational control, and facility protection across residential, commercial, and industrial environments.

Low-Current Systems

Comprehensive low-current solutions including structured cabling, audio-visual systems, building automation, telephone systems, data networks, and public address systems, designed to support smart buildings and modern infrastructure requirements.

Passive Network

High-quality passive network infrastructure solutions including fiber optic systems, structured cabling, patch management, grounding systems, and data center infrastructure to ensure reliable connectivity, scalability, and long-term network performance.

SECURITY SYSTEMS

Integrated security solutions including CCTV surveillance, access control systems, intrusion detection, intercom systems, and smart monitoring technologies designed to enhance safety, operational control, and facility protection. Our systems are tailored to residential, commercial, industrial, and infrastructure projects while ensuring reliability, scalability, and efficient security management.

CCTV & Surveillance

Advanced HD CCTV and surveillance systems featuring remote monitoring, motion detection, cloud storage, and real-time monitoring capabilities. We provide integrated surveillance solutions designed to improve operational visibility, enhance site security, and deliver continuous monitoring for residential compounds, commercial facilities, offices, warehouses, and industrial projects.

Access Control & Alarm Systems

Integrated access control, intrusion detection, and fire alarm systems including biometric access, keycard entry, emergency notifications, and smart security integration. Our solutions are designed to enhance facility safety, manage authorized access efficiently, and provide reliable protection through intelligent monitoring and rapid emergency response.

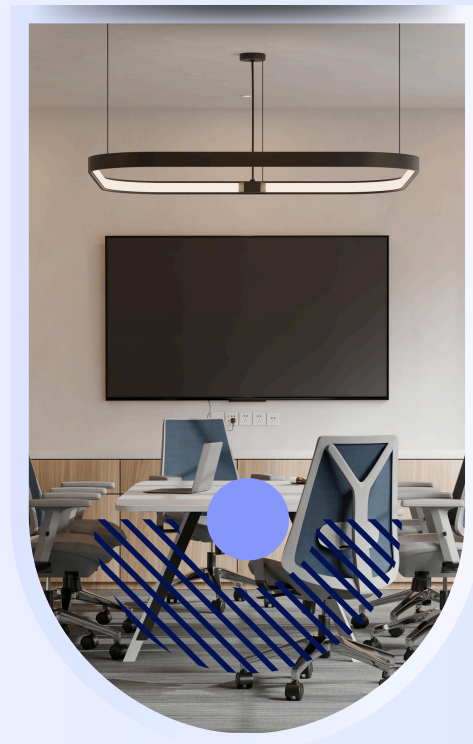

LOW-CURRENT SYSTEMS

Structured Cabling

Audio-Visual Systems

Integrated low-current infrastructure solutions including structured cabling, audio-visual systems, building automation, public address systems, telephone systems, and data networks. Our solutions are designed to support smart buildings and modern operational requirements, delivering reliable connectivity, seamless communication, and efficient system integration across residential, commercial, and industrial facilities.

PASSIVE NETWORK

Integrated passive network infrastructure solutions including structured cabling, fiber optic systems, patch management, and data center connectivity designed to support reliable communication and high-performance network operations. Our solutions are tailored to modern infrastructure requirements while ensuring scalability, organized network management, and long-term operational efficiency.

Structured Cabling

Professional structured cabling solutions including copper and fiber optic installations designed to provide organized, scalable, and high-speed network infrastructure for commercial buildings, offices, industrial facilities, and data environments.

Fiber Optic Solutions

High-performance fiber optic systems designed for reliable data transmission, enhanced bandwidth capacity, and long-distance connectivity. We deliver efficient fiber network solutions that support modern communication systems, data-intensive applications, and future infrastructure expansion.

WHY CHOOSE US

ALKLEMAH combines engineering expertise, professional execution, and integrated contracting solutions to deliver reliable results across HVAC, MEP, civil works, electrical systems, security solutions, low-current infrastructure, passive networks, and interior design projects. Our team is committed to delivering high-quality services that meet modern construction standards while ensuring safety, efficiency, and long-term operational performance.

With a strong focus on quality workmanship, technical reliability, and client satisfaction, we deliver customized solutions tailored to residential, commercial, and industrial projects. Through professional planning, advanced technologies, and efficient project execution, **ALKLEMAH** continues to build trusted partnerships and deliver sustainable solutions that support modern infrastructure and development projects.

CLIENTS & PARTNERS

Integrated contracting and engineering solutions delivered through trusted partnerships, successful collaborations, and long-term client relationships across residential, commercial, industrial, and infrastructure projects.

Trusted Clients

We work with leading organizations across construction, infrastructure, industrial, commercial, and public sectors, delivering reliable solutions through professional execution, quality workmanship, and a commitment to long-term project success.

Strategic Partners

Our strategic partnerships with industry-leading suppliers, manufacturers, and technology providers enable us to deliver advanced, reliable, and standards-compliant solutions that support complex project requirements and long-term operational performance.
